

Vessel Repair, Maintenance & Fabrication Services

About Us

Located at the Port of Coeymans on the Hudson River, Carver Marine Steel Works delivers comprehensive vessel repair, fabrication, and heavy-lift services backed by industry-leading equipment and certified expertise.

Phil Gallo | General Manager

Phil Gallo brings more than 18 years of commercial maritime experience to Carver Marine Steel Works. A SUNY Maritime College graduate, Phil joined Carver Companies in 2020 and built the Steelworks division into a responsive, quality-driven vessel repair and maintenance operation. With experience at sea, in shipyards, and as a global marine surveyor, he leads each project with a hands-on approach focused on safety, schedule, and execution.

The Carver Advantage

- ✔ **Strategic Hudson River Location:** Located at the Port of Coeymans, a full-service Hudson River marine terminal supporting large-scale infrastructure, energy, and industrial projects with extensive waterfront and laydown capacity.
- ✔ **Seamless Integration:** Working in coordination with Carver Marine Towing, we offer streamlined mobilization, special towing opportunities, and reduced overall project costs.
- ✔ **Industry Expertise:** Our team comprises skilled professionals with years of experience in the maritime industry, ensuring that each project is executed with precision and proficiency.

Services

Vessel Repair & Maintenance

From structural steel renewal to propulsion system overhauls, we provide full-spectrum repair services both afloat and on the hard. Our experienced team ensures precision execution and dependable results.

Welding & Fabrication

With ABS & AWS certified welders available daily, we deliver high-quality structural repairs, custom steel fabrication, and complex modifications for projects of any scale.

Haul-Out & Dry Docking

Our 820MT Marine Travelift handles vessels up to 60' beam, enabling efficient haul-outs for inspections, repairs, and maintenance — all with minimal downtime.

Blasting and Coating

Our industrial coating specialists provide thorough surface preparation and high-performance marine coatings, ensuring long-term durability without compromising schedule or safety.

Inspection Services

We support regulatory inspections with efficient haul-out capability and experienced technical oversight. Our team facilitates structural, mechanical, and coating assessments to ensure compliance, safety, and operational readiness.

Custom Project Solutions

Every vessel is different. We tailor solutions to meet unique operational and structural requirements, delivering efficient, project-specific results.

Emergency Services

We provide rapid-response emergency repair and short-haul services to minimize downtime and restore operational readiness. Our team mobilizes quickly to stabilize structural damage and support time-sensitive repair needs.

Off-Site Topping Repair & Maintenance

Our team deploys traveling crews for dockside and remote repair work when hauling to the yard is not required. We provide 24/7 topside repair and maintenance services throughout the Northeast, with dockage and crew support available at our Staten Island (North Shore Terminal) location.

Facility & Equipment Highlights

73,600 ft² Building for All-Weather Operations

- Two 320' x 115' bays
- Radiant heated floor in bay 1
- 95' x 72' sliding overhead doors
- Vessel dry-dock periods performed indoors
- Building heated with 100% recycled oil
- Electrical: 1,200 Amp, 480V
- Building designed for Travelift to enter and block vessels indoors

Outdoor Capabilities: Extensive outdoor storage and staging space with pierside dockage supporting topside repairs, maintenance, and tank cleaning.

Waterfront Access: Direct access at the Port of Coeymans with a 300' x 60' inlet for haul-outs.

820 MT Marine Travelift: Our 820MT Marine Travelift stands ready to swiftly haul-out and transport vessels up to 60' beam for dry docking or concise hauls tailored to expedite critical inspections and essential repair tasks.

Heavy Lift Capability: Our Travelift can be fitted with 60' wide lift frames to accommodate heavy lifts up to 420 short tons (ST) for project cargo needs.
